

Westpac KiwiSaver Scheme

Defensive Conservative Fund

Fund Update for the quarter ended:

30 June 2022

This fund update was first made publicly available on 28 July 2022.

What is the purpose of this update?

This document tells you how the Defensive Conservative Fund¹ has performed and what fees were charged. The document will help you to compare the fund with other funds. BT Funds Management (NZ) Limited² prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Defensive Conservative Fund aims to provide stable returns over the short to medium term. The fund invests primarily in income assets but also has a 20% benchmark allocation to growth assets. Volatility is expected to be higher than the Cash Fund but lower than the Conservative Fund in the Westpac KiwiSaver Scheme.

Total value of the fund	\$ 214,695,541
Number of investors in the fund	15,646
The date the fund started	2 July 2014

How has the fund performed?

	Average over past 5 years	Past year
Annual return (after deductions for charges and tax)	2.17%	-5.60%
Annual return (after deductions for charges but before tax)	2.58%	-6.59%
Market index annual return (reflects no deductions for charges and tax)	2.51%	-6.74%

The market index return reflects a composite of benchmark index returns, weighted for the fund's target asset allocation. The benchmark indices used for each asset class are defined in the Statement of Investment Policy and Objectives (SIPO).

Effective from 21 June 2022, there has been a change to the underlying market index for Australasian equities, an asset class included in the market index. This change occurred so that the market index was more reflective of the underlying assets of the asset class.

Additional information about the market index is available in the SIPO on the offer register at disclose-register.companiesoffice.govt.nz.

What are the risks of investing?

Risk indicator for the Defensive Conservative Fund.³

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-kickstarter

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five years to 30 June 2022. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

Annual return graph

This shows the return after fund charges and tax for each complete year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 June 2022.

Important: This does not tell you how the fund will perform in the future. Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Defensive Conservative Fund are charged fund charges. In the year to 31 March 2022, these were:

	% of net asset value
Total fund charges⁴	0.39%
Which are made up of	
Total management and administration charges	0.39%
Including -	
Manager's basic fee	0.34%
Other management and administration charges	0.05%
Total performance-based fees	0.00%
Other charges	\$ amount per investor
Membership Fee ⁵	\$5.90

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Jason had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Jason incurred a loss after fund charges were deducted of -\$560 (that is -5.60% of his initial \$10,000). Jason also paid \$6 in other charges. This gives Jason a total loss after tax of -\$566 for the year.

What does the fund invest in?

This shows the types of assets that the fund invests in.⁶

Actual investment mix⁷

Target investment mix

Cash and cash equivalents	15.00%

Further information

You can also obtain this information, the PDS for the Westpac KiwiSaver Scheme, and some additional information from the offer register at disclose-register.companiesoffice.govt.nz.

Notes

1. The Defensive Conservative Fund (established as the Defensive Fund) was last known as the Default Fund.
2. BT Funds Management (NZ) Limited is the scheme provider and Westpac New Zealand Limited is the distributor of the Westpac KiwiSaver Scheme.
3. The risk indicator for the fund is calculated based on the volatility of returns over the past five years, which may not be a full investment cycle. In some cases the risk indicator might differ if calculated using a longer timeframe. We believe an average investment cycle is generally considered to be a period of between 7 to 10 years. If the period of returns data that a risk indicator is based on has had unusually low or high volatility the risk indicator presented in this fund update (or the PDS) may provide a less reliable indication of a fund's potential future volatility.
4. The amounts specified include GST, where applicable.
5. Membership fees are the fixed dollar charges for membership in the Westpac KiwiSaver Scheme. You will pay this fee only once even if you are invested in multiple funds within the Westpac KiwiSaver Scheme. The Membership fees have been removed for all members from 28 September 2021.
6. For further information on each of the asset classes refer to the PDS and the SIPO.
7. For the reporting of the Actual investment mix, cash and cash equivalents held for operational and hedging purposes at an asset class level (in the underlying funds) are assigned to the asset class to which they relate.
8. The top 10 investments have been calculated excluding cash and cash equivalents held for operational and hedging purposes.
