Westpac KiwiSaver Scheme

High Growth Fund

Fund Update for the quarter ended:

30 September 2024

This fund update was first made publicly available on 29 October 2024.

What is the purpose of this update?

This document tells you how the High Growth Fund[1] has performed and what fees were charged. The document will help you to compare the fund with other funds. BT Funds Management (NZ) Limited[2] prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The High Growth Fund aims to provide the highest long-term returns of any of the funds. It invests solely in growth assets. Volatility is expected to be the highest of the funds.

Total value of the fund	$ 54,342,605
Number of investors in the fund	1,520
The date the fund started	25 September 2024

What are the risks of investing?

Risk indicator for the High Growth Fund. [3, 4]

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-profiler

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five years to 30 September 2024. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	Not Applicable
Annual return (after deductions for charges but before tax)	Not Applicable
Market index annual return (reflects no deductions for charges and tax)	22.57%

The market index return reflects a composite of benchmark index returns, weighted for the fund's target asset allocation. The benchmark indices used for each asset class are defined in the Statement of Investment Policy and Objectives (SIPO).

Additional information about the market index is available in the Statement of Investment Policy and Objectives (SIPO) on the offer register at disclose-register.companiesoffice.govt.nz.

.

What fees are investors charged?

Investors in the High Growth Fund are charged fund charges. In the year to 31 March 2024, these were:

	% of net asset value
Total fund charges[5]	**0.70%**
Which are made up of	
Total management and administration charges Including -	**0.70%**
Manager's basic fee	0.00%
Other management and administration charges	0.00%
Total performance-based fees	**0.00%**
Other charges	**$ amount per investor**
Other Charges	$0.00

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

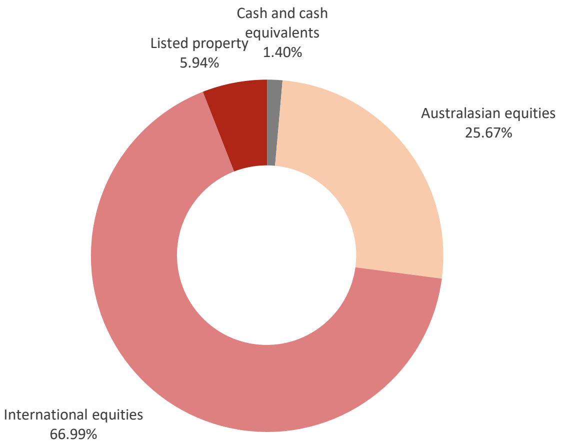
Jason had $10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Jason received a return after fund charges were deducted of $2,257* (that is 22.57% of his initial $10,000). Jason did not pay anything in other charges. This gives Jason a total return after tax of $2,257 for the year.

*As the fund started on the date noted above, this calculation is based on the market index return for the year.

What does the fund invest in?

This shows the types of assets that the fund invests in. [6]

Actual investment mix[7]



Target investment mix

Australasian equities	26.00%

Further information

You can also obtain this information, the PDS for the Westpac KiwiSaver Scheme, and some additional information from the offer register at disclose-register.companiesoffice.govt.nz

Notes

1. The High Growth Fund was available for investment from 25 September 2024.
2. BT Funds Management (NZ) Limited is the scheme provider and Westpac New Zealand Limited is the distributor of the Westpac KiwiSaver Scheme.
3. The risk indicator for the fund is calculated based on the volatility of returns over the past five years, which may not be a full investment cycle. In some cases the risk indicator might differ if calculated using a longer timeframe. We believe an average investment cycle is generally considered to be a period of between 7 to 10 years. If the period of returns data that a risk indicator is based on has had unusually low or high volatility the risk indicator presented in this fund update (or the PDS) may provide a less reliable indication of a fund's potential future volatility.
4. As the fund has not been in existence for five full years, its risk indicator has been calculated using market index returns as well as actual returns. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund. Market index returns have been used for the period from 1 October 2019 to 26 September 2024.
5. The amounts specified include GST, where applicable.
6. For further information on each of the asset classes refer to the PDS and the SIPO.
7. For the reporting of the Actual investment mix, cash and cash equivalents held for operational and hedging purposes at an asset class level (in the underlying funds) are assigned to the asset class to which they relate.
8. The top 10 investments have been calculated excluding cash and cash equivalents held for operational and hedging purposes.
