

Westpac KiwiSaver Scheme

Default Balanced Fund

Fund Update for the quarter ended:

31 March 2022

This fund update was first made publicly available on 3 May 2022.

What is the purpose of this update?

This document tells you how the Default Balanced Fund¹ has performed and what fees were charged. The document will help you to compare the fund with other funds. BT Funds Management (NZ) Limited² prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Default Balanced Fund aims to provide moderate to medium returns over the medium to long term. The fund has an equal benchmark allocation to growth assets and income assets. Volatility is expected to be higher than the Moderate Fund but lower than the Balanced Fund in the Westpac KiwiSaver Scheme.

Total value of the fund	\$ 517,753,199
Number of investors in the fund	60,313
The date the fund started	1 December 2021

What are the risks of investing?

Risk indicator for the Default Balanced Fund.^{3 4}

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-kickstarter

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five years to 31 March 2022. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	Not Applicable
Annual return (after deductions for charges but before tax)	Not Applicable
Market index annual return (reflects no deductions for charges and tax)	0.02%

The market index return reflects a composite of benchmark index returns, weighted for the fund's target asset allocation. The benchmark indices used for each asset class are defined in the Statement of Investment Policy and Objectives (SIPO).

Additional information about the market index is available in the SIPO on the offer register at disclose-register.companiesoffice.govt.nz.

What fees are investors charged?

Investors in the Default Balanced Fund are charged fund charges. The total annual fund charges, expressed as a percentage of the net asset value of the fund, are estimated as follows:

	% of net asset value
Total fund charges⁵	0.40%
Which are made up of	
Total management and administration charges	0.40%
Including -	
Manager's basic fee	0.40%
Other management and administration charges	0.00%
Total performance-based fees	0.00%
Other charges	\$ amount per investor
Other Charges	\$0.00

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Jason had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Jason received a return after fund charges were deducted of \$2* (that is 0.02% of his initial \$10,000). Jason did not pay anything in other charges. This gives Jason a total return after tax of \$2 for the year.

*As the fund started on the date noted above, this calculation is based on the market index return for the year.

What does the fund invest in?

This shows the types of assets that the fund invests in.⁶

Further information

You can also obtain this information, the PDS for the Westpac KiwiSaver Scheme, and some additional information from the offer register at disclose-register.companiesoffice.govt.nz.

Notes

1. The Default Balanced Fund was available for investment from 1 December 2021.
2. BT Funds Management (NZ) Limited is the scheme provider and Westpac New Zealand Limited is the distributor of the Westpac KiwiSaver Scheme.
3. The risk indicator for the fund is calculated based on the volatility of returns over the past five years, which may not be a full investment cycle. In some cases the risk indicator might differ if calculated using a longer timeframe. We believe an average investment cycle is generally considered to be a period of between 7 to 10 years. If the period of returns data that a risk indicator is based on has had unusually low or high volatility the risk indicator presented in this fund update (or the PDS) may provide a less reliable indication of a fund's potential future volatility.
4. As the fund has not been in existence for five full years, its risk indicator has been calculated using market index returns as well as actual returns. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund. Market index returns have been used for the period from 1 April 2017 to 1 December 2021.
5. The amounts specified include GST, where applicable.
6. For further information on each of the asset classes refer to the PDS and the SIPO.
7. For the reporting of the Actual investment mix, cash and cash equivalents held for operational and hedging purposes at an asset class level (in the underlying funds) are assigned to the asset class to which they relate.
8. The top 10 investments have been calculated excluding cash and cash equivalents held for operational and hedging purposes.
