

Westpac KiwiSaver Scheme

Default Fund

Fund Update for the quarter ended:

30 June 2016

This fund update was first made publicly available on 28 July 2016.

What is the purpose of this update?

This document tells you how the Default Fund¹ has performed and what fees were charged. The document will help you to compare the fund with other funds. BT Funds Management (NZ) Limited² prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Default Fund aims to provide stable returns over the short to medium term. The fund invests primarily in income assets but is required to have an allocation to growth assets of between 15% and 25%. Volatility is expected to be higher than the Cash Fund but lower than the Conservative Fund in the Westpac KiwiSaver Scheme.

Total value of the fund	\$ 61,851,374
Number of investors in the fund	16,738
The date the fund started	2 July 2014

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	4.02%
Annual return (after deductions for charges but before tax)	5.34%
Market index annual return (reflects no deduction for charges and tax)	6.97%

The market index return reflects a composite of benchmark index returns, weighted for the fund's target asset allocation. The benchmark indices used for each asset class are defined in the Statement of Investment Policy and Objectives (SIPO).

Additional information about the market index is available in the SIPO on the register at business.govt.nz/disclose

What are the risks of investing?

Risk indicator for the Default Fund^{3,4}

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at westpac.co.nz/kiwisaverriskprofiler

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five years to 30 June 2016. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

Annual return graph

This shows the return after fund charges and tax for each complete year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 June 2016.

Important: This does not tell you how the fund will perform in the future. Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Default Fund are charged fund charges. In the year to 31 March 2016, these were:

	% of net asset value
Total fund charges	0.55%
Which are made up of	
Total management and administration charges including-	
Manager's basic fee	0.40%
Other management and administration charges	0.15%
Total performance-based fees	0.00%
Other charges	\$ amount per investor
Membership Fee ⁵	\$27.00

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Jason had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Jason received a return after fund charges were deducted of \$402 (that is 4.02% of his initial \$10,000). Jason also paid \$27 in other charges. This gives Jason a total return after tax of \$375 for the year.

What does this fund invest in?

Actual investment mix

This shows the types of assets that the fund invests in.⁶

Target investment mix

Further information

You can also obtain this information, the PDS for the Westpac KiwiSaver Scheme, and some additional information from the offer register at business.govt.nz/disclose

Notes

1. The Westpac KiwiSaver Scheme Default Fund was formerly known as the Westpac KiwiSaver Scheme Defensive Fund.
2. BT Funds Management (NZ) Limited is the scheme provider and Westpac New Zealand Limited is the distributor of the Westpac KiwiSaver Scheme.
3. The risk category for each fund is calculated based on the volatility of past returns over five years and this does not represent a full investment cycle. The output may be different if calculated using a longer timeframe. We believe an average investment cycle is generally considered to be a period of between 7 to 10 years. If the period of returns data that a risk indicator is based on was one of unusually low or unusually high volatility the risk category presented in a PDS (or any fund update) may not reflect the fund's future volatility.
4. As the fund has not been in existence for five full years, its risk category has been calculated using market index returns as well as actual returns. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund. Market index returns have been used for the period from July 2011 to July 2014.
5. Membership fees are the monthly fixed dollar charges for membership in the Westpac KiwiSaver Scheme. You will pay this fee only once each month even if you are invested in multiple funds within the Westpac KiwiSaver Scheme.
6. For further information on each of the asset classes refer to the PDS and the SIPO.
7. The top 10 investments have been calculated excluding cash and cash equivalents held for operational and hedging purposes.
